<tr>
<td>• Figure 2: In contrast to rumors, there are no obvious similarities between Adam Weishaupt and George Washington!</td>
<td><img src="image2.png" alt="Image of Adam Weishaupt" /></td>
</tr>
<tr>
<td>• Figure 3: The owl does not have a specific symbolic meaning, sometimes it represents mischief, however, it often stands for wisdom (e.g. the owl is used as a symbol by many publishers).</td>
<td><img src="image3.png" alt="Image of an owl" /></td>
</tr>
<tr>
<td>• Figure 4: The triangle represents the all-seeing eye of God in Christianity (the picture is an image of part of a stained glass window in a Christian church).</td>
<td><img src="image4.png" alt="Image of the all-seeing eye" /></td>
</tr>
</tbody>
</table>
Are there any clues on the US $1 bill that suggest an infiltration of the USA by secret societies?

No!
How did this urban legend and other conspiracy theories arise?
How did this urban legend and other conspiracy theories arise?

- They are often more exciting than reality!
- They are based on statements that are difficult to check or prove (e.g. that Washington looks like Weishaupt).
- They conceal alternative explanations (e.g. that the repetitive use of 13 symbols is related to the 13 original states).
- Legends are sometimes based on facts taken out of context. The significance of these details is also largely exaggerated (Washington was a freemason, however, that does not mean that the USA were infiltrated or still are).
- Freemasons and other confederacies can raise suspicion because they act secretly.
- But: Contrary to common belief the freemasons do not believe in satan but in a ‘higher being’ (e.g. God, Allah ...). They pursue liberal ideas, but they are not ‘rebellious’.
There are numerous examples in history where minorities and outcasts were falsely blamed for uncontrollable, catastrophic events. For example, in medieval times a poor harvest was often blamed on witchcraft or religious minorities.

These simple explanations reduced tension and fear and provided the illusion of control.
Studies show that many people with psychosis (but not all!) make decisions on the basis of little information.
Studies show that many people with psychosis (but not all!) make decisions on the basis of little information.

This style of decision making can easily lead to errors. Therefore, it is better to use a decision-making style that takes into account all available information.
How jumping to conclusion promotes misinterpretations during psychosis – examples

<table>
<thead>
<tr>

<th>Explanation during psychosis</th>
<th>Other explanations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your body aches after your first night in hospital.</td>
<td>You must have been kidnapped overnight and had your organs removed; another patient harmed you during the night; voodoo.</td>
<td>Uncomfortable bed, tension; it is common to have an uncomfortable night when in a new environment; might be a pinched nerve.</td>
</tr>
<tr>
<td>After outpatient surgery, you are prescribed Heparin injections.</td>
<td>Doctors are planning to murder you with toxic injections.</td>
<td>Standard thrombosis prophylaxis.</td>
</tr>
<tr>
<td>On the way to a friend’s, you have to stop three times at red traffic lights.</td>
<td>Evidence that you are in danger – someone wants to harm you.</td>
<td>Pure coincidence (when you are in a hurry you are more prone to notice red lights).</td>
</tr>
</tbody>

Task 2:
What do you see?
What do you see now?
Hasty decisions do not always lead to errors but sometimes tell only half the story!
Hasty decisions do not always lead to errors but sometimes tell only half the story!

Try to discover all the details/figures in the following pictures!
Woman or saxophone player?
Duck or rabbit?
Face or rider?
Jesus or crucifixion?
Madonna or harp-playing fairy?
The last slides demonstrate that quick decisions can lead to mistakes and often only “half the truth” is recognized.
The last slides demonstrate that quick decisions can lead to mistakes and often only “half the truth” is recognized.

Therefore look for as much information as possible and exchange views with others, especially if decisions are crucial or have dramatic implications (e.g. feeling that your neighbor is chasing after you -> don’t attack the assumed enemies!).
The last slides demonstrate that quick decisions can lead to mistakes and often only “half the truth” is recognized.

Therefore look for as much information as possible and exchange views with others, especially if decisions are crucial or have dramatic implications (e.g. feeling that your neighbor is chasing after you → don’t attack the assumed enemies!).

For events of minor importance, we may as well decide quickly (e.g. choosing a yogurt brand or sort of cake, picking lottery numbers).
The last slides demonstrate that quick decisions can lead to mistakes and often only “half the truth” is recognized. Therefore look for as much information as possible and exchange views with others, especially if decisions are crucial or have dramatic implications (e.g. feeling that your neighbor is chasing after you → don’t attack the assumed enemies!).

For events of minor importance, we may as well decide quickly (e.g. choosing a yogurt brand or sort of cake, picking lottery numbers).

To err is human – be prepared for the possibility that you are wrong.
The last slides demonstrate that quick decisions can lead to mistakes and often only “half the truth” is recognized.

Therefore look for as much information as possible and exchange views with others, especially if decisions are crucial or have dramatic implications (e.g. feeling that your neighbor is chasing after you → don’t attack the assumed enemies!).

For events of minor importance, we may as well decide quickly (e.g. choosing a yogurt brand or sort of cake, picking lottery numbers).

To err is human – be prepared for the possibility that you are wrong.

Base important decisions on solid facts. Mere guesses are “bad advisers.” Always consider the consequences of a wrong judgment.
What does this have to do with psychosis?

Many (but not all!) people with psychosis tend to jump to conclusions and to form extreme opinions.
What does this have to do with psychosis?

Many (but not all!) people with psychosis tend to jump to conclusions and to form extreme opinions.

Example: Frank accuses his roommate Bertram of trying to poison him!

Background: Food tastes peculiar. They do not like each other.

But: How could Bertram know which meal Frank would take from the trolley? Hardly anyone commits a murder only because of antipathy or minor disagreement.
Many (but not all!) people with psychosis tend to jump to conclusions and to form extreme opinions.

**Example:** Frank accuses his roommate Bertram of trying to poison him!

**Background:** Food tastes peculiar. They do not like each other.

**But:** How could Bertram know which meal Frank would take from the trolley? Hardly anyone commits a murder only because of antipathy or minor disagreement.

Many pieces of information should be considered. Discuss a variety of explanations and opinions with people you trust.
Thank you for your attention!

for trainers:

</thead>
</table>
| Allegedly the moon landing in 1969 never took place and was merely a fake. | **Against:**  
  1. The waving of the flag was caused by ramming the pole into the moon’s surface and a supporting mounted crossbar  
  2. Night photographies cannot capture weak light sources due to exposure times → no stars  
  3. The varying shadows were caused by the uneven moon surface  
  4. The interview had been edited in order to cover the original time delay between Nixon’s and Armstrong’s dialog | ![Moon landing](image) |
Was the moon landing faked by the US Government?

No!

Director Roland Emmerich (Independence Day): 
“The moon landing (...) was just too good. Such a thing was impossible to stage in the 1960s. Even with today’s equipment this would pose problems.”

Source: German television station ZDF: „Vorsicht Verschwörung“ (Beware conspiracy)
How did this urban legend and other conspiracy theories arise?
How did this urban legend and other conspiracy theories arise?

- They are often more compelling than reality.
- They are based on facts that are hard to check and people believe them easily (e.g., waving flag suggests that pictures were taken on earth).
- They conceal alternative explanations (e.g., the starless sky can be explained by the technical limitations of night photography).
- Urban legends take facts out of context and push them to the limit.
